

DIRECTIVES REGARDING PREVENTION OF POLLUTION

We, Montanstahl SA, have verified the correspondence of our Stainless Steel products with the main European Regulations and the main market standards concerning pollution prevention. The conclusion of our investigation is that our Stainless Steel products (in any delivery condition) do not contain the hazardous substances mentioned in the following directives and regulations:

- 2000/53/EC – 2002/525/EC – 2005/673/EC (End-of-life vehicles)
- 2012/19/EC – (WEEE)
- 2011/65/EC – 2015/863/EC – 2017/2102/EC (RoHS)
- 842/06/EC – European regulation relating to fluoride gas
- Bosch Norm N 2580
- VDA-232-101

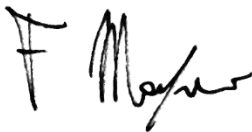

Note concerning some Directives out of validity:

- Directive 2002/95/EC was repealed and replaced by 2011/65/EC

Mill test Certificates issued and supplied with the delivered material report the exact composition of each heat, confirming compliance to the relevant Standards. They also permit the complete traceability to the certificates of parent material used for our operations.

In case of any further question concerning this subject, please contact us.
