

**STAINLESS STEEL AND FOOD USE**

We attest that austenitic stainless steels 304L and 316L (as the homologous 1.4307 and 1.4404 as reported in EN 10088-3) satisfy requirements of regulations CE1935/2004 and CE2023/2006, and are so usable for the production of products intended to get in contact with foods and water intended for human use.
